## SUMMARY

I am a dedicated audio engineer, musician, and software developer who has a keen eye for detail, a strong ability to communicate, and a talent for responding to problems quickly and efficiently. I have the skills to create Full Stack applications, with JavaScript, React, and Java. I strive for excellence in every product or song I create. I value feedback, collaboration, and above all, integrity. I look forward to finding creative and effective solutions for your company.

## LANGUAGES | FRAMEWORKS | TOOLS

Java, JavaScript | React | MySQL | LogicPro, ProTools

## EXPERIENCE

### **Cole's Creative Webpage** — LaunchCode Capstone Project

- Interactive React web page for musicians and artists
- Designed a Song Form component that allows users to see their input in real time
- Developed a Generator component that fetches data and randomly prints advice at the click of a button

### **Audio Engineer** — Freelance/Contractor

April 2022 - Present

- Manage live event production for sound, lights, and video
- Set up, operate, and maintain full professional audio rigs. Including a variety of industry standard mixing consoles.
- Adept at building stages, trusses, video walls, screens, audio rigs, lightening rigs, and setting up many types of live events.
- Excels at troubleshooting issues at a moments notice
- A few companies I have worked for: Z2 Entertainment, Mountain West Production Group, Colorado Chautauqua Association, and Naropa University.

### **Vitamin Clerk** — Sprouts Farmers Market

August 2019 - December 2022

- Stock, Organize, clean, and maintain product integrity
- Assist customers diligently
- Manage inventory and backstock using the latest technology

## EDUCATION

**LaunchCode**, Full Stack Development, 2025

**Naropa University**, Bachelor of Arts, Music
